

Saved My Life! Target Fixation Class – Thank you to Road Captain, Chris Probst December 6, 2015

Why we as a club are stronger than as just individuals: This narrative is part of an email I sent to Chris the following week after our Target Fixation class:

Chris, thank you for putting on the driving safety class at our meeting.. I had a car turn in front of me last night (yes, I was at coffee and came home in the dark - broke one of my own rules - "don't ride after dark") at Vine and Lemay. I remember the car already in the intersection before I saw it. I looked at the bumper and front end, then looked where I was going with the bike. I was locked up and sliding sideways towards where I was looking to go to avoid the crash. Then looked to Lemay again to where I wanted to go and the bike righted and I simply drove on without any impact. I didn't even have time to have a heart rate increase. Did I mention I LOVE MY Harley! God truly blessed me last night. Thank you for your part in helping me making it past that situation.

Thank you, Bill
